

deemed necessary. The registration of a tannery or other agent shall be subject to such conditions as the Secretary prescribes, which may include, but are not limited to, provisions regarding records, inventory segregation, reports, and inspection. The Secretary may charge a reasonable fee for processing such applications, including an appropriate apportionment of overhead and administrative expenses of the Department of Commerce.

(d) Notwithstanding the preceding provisions of this section, whenever, under the MMPA, the Secretary determines any species of stock of marine mammals to be depleted, he may prescribe regulations pursuant to section 103 of the MMPA upon the taking of such marine animals by any Indian, Aleut, or Eskimo and, after promulgation of such regulations, all takings of such marine mammals shall conform to such regulations.

(e) *Marking and reporting of Cook Inlet Beluga Whales.* (1) *Definitions.* In addition to definitions contained in the MMPA and the regulations in this part:

(i) *Reporting* means the collection and delivery of biological data, harvest data, and other information regarding the effect of taking a beluga whale (*Delphinapterus leucas*) from Cook Inlet, as required by NMFS.

(ii) *Whaling captain or vessel operator* means the individual who is identified by Alaskan Natives as the leader of each hunting team (usually the other crew on the boat) and who is the whaling captain; or the individual operating the boat at the time the whale is harvested or transported to the place of processing.

(iii) *Cook Inlet* means all waters of Cook Inlet north of 59° North latitude, including, but not limited to, waters of Kachemak Bay, Kamishak Bay, Chinitna Bay, and Tuxedni Bay.

(2) *Marking.* Each whaling captain or vessel operator, upon killing and landing a beluga whale (*Delphinapterus leucas*) from Cook Inlet, Alaska, must remove the lower left jawbone, leaving the teeth intact and in place. When multiple whales are harvested during one hunting trip, the jawbones will be marked for identification in the field to ensure correct reporting of harvest information by placing a label marked

with the date, time, and location of harvest within the container in which the jawbone is placed. The jawbone(s) must be retained by the whaling captain or vessel operator and delivered to NMFS at the Anchorage Field Office, 222 West 7th Avenue, Anchorage, Alaska 99513 within 72 hours of returning from the hunt.

(3) *Reporting.* Upon delivery to NMFS of a jawbone, the whaling captain or vessel operator must complete and mail a reporting form, available from NMFS, to the NMFS Anchorage Field Office within 30 days. A separate form is required for each whale harvested.

(i) To be complete, the form must contain the following information: the date and location of kill, the method of harvest, and the coloration of the whale. The respondent will also be invited to report on any other observations concerning the animal or circumstance of the harvest.

(ii) Data collected pursuant to paragraph (e) of this section will be reported on forms obtained from the Anchorage Field Office. These data will be maintained in the NMFS Alaska Regional Office in Juneau, Alaska, where such data will be available for public review.

(4) No person may falsify any information required to be set forth on the reporting form as required by paragraph (e) of this section.

(5) The Anchorage Field Office of NMFS is located in room 517 of the Federal Office Building, 222 West 7th Avenue; its mailing address is: NMFS, Box 43, Anchorage, AK. 99513.

[39 FR 1852, Jan. 15, 1974, as amended at 59 FR 50376, Oct. 3, 1994; 64 FR 27927, May 24, 1999]

§ 216.24 Taking and related acts incidental to commercial fishing operations by tuna purse seine vessels in the eastern tropical Pacific Ocean.

(a)(1) No marine mammal may be taken in the course of a commercial fishing operation by a United States purse seine fishing vessel in the ETP unless the taking constitutes an incidental catch as defined in § 216.3, and vessel and operator permits have been

obtained in accordance with these regulations, and such taking is not in violation of such permits or regulations.

(2)(i) It is unlawful for any person using a United States purse seine fishing vessel of 400 short tons (st) (362.8 metric tons (mt)) carrying capacity or less to intentionally deploy a net on or to encircle dolphins, or to carry more than two speedboats, if any part of its fishing trip is in the ETP.

(ii) It is unlawful for any person using a United States purse seine fishing vessel of greater than 400 short tons (362.8 mt) carrying capacity that does not have a valid permit obtained under these regulations to catch, possess, or land tuna if any part of the vessel's fishing trip is in the ETP.

(iii) It is unlawful for any person subject to the jurisdiction of the United States to receive, purchase, or possess tuna caught, possessed, or landed in violation of paragraph (a)(2)(ii) of this section.

(iv) It is unlawful for a person subject to the jurisdiction of the United States to intentionally deploy a purse seine net on, or to encircle, dolphins from a vessel operating in the ETP when the DML assigned to that vessel has been reached, or when there is not a DML assigned to that vessel.

(3) Upon written request made in advance of entering the ETP, the limitations in paragraphs (a)(2)(i) and (a)(2)(ii) of this section may be waived by the Administrator, Southwest Region, for the purpose of allowing transit through the ETP. The waiver will provide, in writing, the terms and conditions under which the vessel must operate, including a requirement to report by radio to the Administrator, Southwest Region, the vessel's date of exit from or subsequent entry into the permit area.

(b) *Permits*—(1) *Vessel permit*. The owner or managing owner of a United States purse seine fishing vessel of greater than 400 st (362.8 mt) carrying capacity that participates in commercial fishing operations in the ETP must possess a valid vessel permit issued under this paragraph (b) of this section. This permit is not transferable and must be renewed annually. If a vessel permit holder surrenders his/her permit to the Administrator, South-

west Region, the permit will not be returned and a new permit will not be issued before the end of the calendar year. Vessel permits are valid through December 31 of each year.

(2) *Operator permit*. The person in charge of and actually controlling fishing operations (hereinafter referred to as the operator) on a United States purse seine fishing vessel engaged in commercial fishing operations under a vessel permit must possess a valid operator permit issued under paragraph (b) of this section. Such permits are not transferable and must be renewed annually. To receive a permit, the operator must have satisfactorily completed all required training under paragraph (c)(4) of this section. The operator's permit is valid only when the permit holder is on a vessel with a valid vessel permit. Operator permits will be valid through December 31 of each year.

(3) *Possession and display*. A valid vessel permit issued pursuant to paragraph (b)(1) of this section must be on board the vessel while engaged in fishing operations, and a valid operator permit issued pursuant to paragraph (b)(2) of this section must be in the possession of the operator to whom it was issued. Permits must be shown upon request to NMFS enforcement agents, or to U.S. Coast Guard officers, or to designated agents of NMFS or the IATTC (including observers). A vessel owner or operator who is at sea on a fishing trip when his or her permit expires and to whom a permit for the next year has been issued may take marine mammals under the terms of the new permit without having to display it on board the vessel until the vessel returns to port.

(4) *Application for vessel permit*. The owner or managing owner of a purse seine vessel may apply for a vessel permit from the Administrator, Southwest Region, allowing at least 45 days for processing. The application must be signed by the applicant and contain:

(i) The name, official number, tonnage, carrying capacity in short or metric tons, maximum speed in knots, processing equipment, and type and

quantity of gear, including an inventory of equipment required under paragraph (c)(2) of this section if the application is for purse seining involving the intentional taking of marine mammals, of the vessel that is to be covered under the permit;

(ii) A statement of whether the vessel will make sets involving the intentional taking of marine mammals;

(iii) The type and identification number(s) of Federal, State, and local commercial fishing licenses under which vessel operations are conducted, and the dates of expiration;

(iv) The name(s) of the operator(s) anticipated to be used; and

(v) The name of the applicant, whether he/she is the owner or the managing owner, his/her address, telephone and fax numbers, and, if applicable, the name, address, telephone and fax numbers of the agent or organization acting on behalf of the vessel.

(5) *Application for operator permit.* A person wishing to operate a purse seine vessel may apply for an operator permit from the Administrator, Southwest Region, allowing at least 45 days for processing. The application must be signed by the applicant or the applicant's representative, if applicable, and contain:

(i) The name, address, telephone and fax numbers of the applicant;

(ii) The type and identification number(s) of any Federal, state, and local fishing licenses held by the applicant;

(iii) The name of the vessel(s) on which the applicant anticipates serving as an operator; and

(iv) The date, location, and provider of any training for the operator permit.

(6) *Fees.* (i) *Vessel permit application fees.* An application for a permit under paragraph (b)(1) of this section must include a fee for each vessel as specified on the application form. The Assistant Administrator may change the amount of this fee at any time if a different fee is determined in accordance with the NOAA Finance Handbook and specified by the Administrator, Southwest Region, on the application form.

(ii) *Operator permit fee.* There is no fee for a operator permit under paragraph (b)(2) of this section. The Assistant Administrator may impose a fee or change the amount of this fee at any

time if a different fee is determined in accordance with the NOAA Finance Handbook and specified by the Administrator, Southwest Region, on the application form.

(iii) *Observer placement fee.* The vessel permit holder must submit the fee for the placement of observers, as established by the IATTC or other approved observer program, to the Administrator, Southwest Region, by September 1 of the year prior to the year in which the vessel will be operated in the ETP. The Administrator, Southwest Region, will forward all observer placement fees to the IATTC or to the applicable international organization approved by the Administrator, Southwest Region.

(7) *Application approval.* The Administrator, Southwest Region, will determine the adequacy and completeness of an application and, upon determining that an application is adequate and complete, will approve that application and issue the appropriate permit, except for applicants having unpaid or overdue civil penalties, criminal fines, or other liabilities incurred in a legal proceeding.

(8) *Conditions applicable to all permits—* (i) *General Conditions.* Failure to comply with the provisions of a permit or with these regulations may lead to suspension, revocation, modification, or denial of a permit. The permit holder, vessel, vessel owner, operator, or master may be subject, jointly or severally, to the penalties provided for under the MMPA. Procedures governing permit sanctions and denials are found at subpart D of 15 CFR part 904.

(ii) *Observer placement.* By obtaining a permit, the permit holder consents to the placement of an observer on the vessel during every trip involving operations in the ETP and agrees to payment of the fees for observer placement. No observer will be assigned to a vessel unless that vessel owner has submitted payment of observer fees to the Administrator, Southwest Region. The observers may be placed under an observer program of NMFS, IATTC, or another international observer program approved by the IDCP and the Administrator, Southwest Region.

(iii) *Explosives.* The use of explosive devices is prohibited during all tuna

purse seine operations that involve marine mammals.

(iv) *Reporting requirements.* (A) The vessel permit holder of each permitted vessel must notify the Administrator, Southwest Region or the IATTC contact designated by the Administrator, Southwest Region, at least 5 days in advance of the vessel's departure on a fishing voyage to allow for observer placement on every voyage.

(B) The vessel permit holder must notify the Administrator, Southwest Region, or the IATTC contact designated by the Administrator, Southwest Region, of any change of vessel operator at least 48 hours prior to departing on a trip. In the case of a change in operator due to an emergency, notification must be made within 72 hours of the change.

(v) *Data release.* By using a permit, the permit holder authorizes the release to NMFS and the IATTC of all data collected by observers aboard purse seine vessels during fishing trips under the IATTC observer program or another international observer program approved by the Administrator, Southwest Region. The permit holder must furnish the international observer program with all release forms required to authorize the observer data to be provided to NMFS and the IATTC. Data obtained under such releases will be used for the same purposes as would data collected directly by observers placed by NMFS and will be subject to the same standards of confidentiality.

(9) *Mortality and serious injury reports.* The Administrator, Southwest Region, will provide to the public periodic status reports summarizing the estimated incidental dolphin mortality and serious injury by U.S. vessels of individual species and stocks.

(c) *Purse seining by vessels with DMLs.* In addition to the terms and conditions set forth in paragraph (b) of this section, any permit for a vessel to which a DML has been assigned under paragraph (c)(8) of this section and any operator permit when used on such a vessel are subject to the following terms and conditions:

(1) A vessel may be used to chase and encircle schools of dolphins in the ETP

only under the immediate direction of the holder of a valid operator's permit.

(2) *No retention of Marine Mammals.* Except as otherwise authorized by a specific permit, marine mammals incidentally taken must be immediately returned to the ocean without further injury. The operator of a purse seine vessel must take every precaution to refrain from causing or permitting incidental mortality or serious injury of marine mammals. Live marine mammals must not be brailled, sacked up, or hoisted onto the deck during ortza retrieval.

(3) *Gear and equipment required for valid permit.* A vessel possessing a vessel permit for purse seining involving the intentional taking of marine mammals may not engage in fishing operations involving the intentional deployment of the net on or encirclement of dolphins unless it is equipped with a dolphin safety panel in its purse seine, has the other required gear and equipment, and uses the required procedures.

(i) *Dolphin safety panel.* The dolphin safety panel must be a minimum of 180 fathoms in length (as measured before installation), except that the minimum length of the panel in nets deeper than 18 strips must be determined in a ratio of 10 fathoms in length for each strip of net depth. It must be installed so as to protect the perimeter of the backdown area. The perimeter of the backdown area is the length of corkline that begins at the outboard end of the last bowbunch pulled and continues to at least two-thirds the distance from the backdown channel apex to the stern tiedown point. The dolphin safety panel must consist of small mesh webbing not to exceed 1 1/4 inches (3.18 centimeter (cm)) stretch mesh extending downward from the corkline and, if present, the base of the dolphin apron to a minimum depth equivalent to two strips of 100 meshes of 4 1/4 inches (10.80 cm) stretch mesh webbing. In addition, at least a 20-fathom length of corkline must be free from bunchlines at the apex of the backdown channel.

(ii) *Dolphin safety panel markers.* Each end of the dolphin safety panel and dolphin apron must be identified with an easily distinguishable marker.

(iii) *Dolphin safety panel hand holds.* Throughout the length of the corkline under which the dolphin safety panel and dolphin apron are located, hand hold openings must be secured so that they will not allow the insertion of a 1 3/8 inch (3.50 cm) diameter cylindrical-shaped object.

(iv) *Dolphin safety panel corkline hangings.* Throughout the length of the corkline under which the dolphin safety panel and dolphin apron are located, corkline hangings must be inspected by the vessel operator following each trip. Hangings found to have loosened to the extent that a cylindrical object with a 1 3/8 inch (3.50 cm) diameter can be inserted between the cork and corkline hangings, must be tightened so as not to allow the insertion of a cylindrical object with a 1 3/8 inch (3.50 cm) diameter.

(v) *Speedboats.* A minimum of three speedboats in operating condition must be carried. All speedboats carried aboard purse seine vessels and in operating condition must be rigged with tow lines and towing bridles or towing posts. Speedboat hoisting bridles may not be substituted for towing bridles.

(vi) *Raft.* A raft suitable to be used as a dolphin observation-and-rescue platform must be carried.

(vii) *Face mask and snorkel, or view box.* At least two face masks and snorkels or view boxes must be carried.

(viii) *Lights.* The vessel must be equipped with lights capable of producing a minimum of 140,000 lumens of output for use in darkness to ensure sufficient light to observe that procedures for dolphin release are carried out and to monitor incidental dolphin mortality.

(4) *Vessel inspection*—(i) *Annual.* At least once during each calendar year, purse seine nets and other gear and equipment required under § 216.24(c)(2) must be made available for inspection and for a trial set/net alignment by an authorized NMFS inspector or IATTC staff as specified by the Administrator, Southwest Region, in order to obtain a vessel permit.

(ii) *Reinspection.* Purse seine nets and other gear and equipment required by these regulations must be made available for reinspection by an authorized NMFS inspector or IATTC staff as

specified by the Administrator, Southwest Region. The vessel permit holder must notify the Administrator, Southwest Region, of any net modification at least 5 days prior to departure of the vessel in order to determine whether a reinspection or trial set/net alignment is required.

(iii) Upon failure to pass an inspection or reinspection, a vessel may not engage in purse seining involving the intentional taking of marine mammals until the deficiencies in gear or equipment are corrected as required by NMFS.

(5) *Operator permit holder training requirements.* An operator must maintain proficiency sufficient to perform the procedures required herein, and must attend and satisfactorily complete a formal training session approved by the Administrator, Southwest Region, in order to obtain his or her permit. At the training session an attendee will be instructed on the relevant provisions and regulatory requirements of the MMPA and the IDCP, and the fishing gear and techniques that are required for, or will contribute to, reducing serious injury and mortality of dolphin incidental to purse seining for tuna. Operators who have received a written certificate of satisfactory completion of training and who possess a current or previous calendar year permit will not be required to attend additional formal training sessions unless there are substantial changes in the relevant provisions or implementing regulations of the MMPA or the IDCP, or in fishing gear and techniques. Additional training may be required for any operator who is found by the Administrator, Southwest Region, to lack proficiency in the required fishing procedures or familiarity with the relevant provisions or regulations of the MMPA or the IDCP.

(6) *Marine mammal release requirements.* All operators must use the following procedures during all sets involving the incidental taking of marine mammals in association with the capture and landing of tuna.

(i) *Backdown procedure.* Backdown must be performed following a purse seine set in which dolphins are captured in the course of catching tuna, and must be continued until it is no

longer possible to remove live dolphins from the net by this procedure. At least one crewman must be deployed during backdown to aid in the release of dolphins. Thereafter, other release procedures required will be continued so that all live dolphins are released prior to the initiation of the sack-up procedure.

(ii) *Prohibited use of sharp or pointed instrument.* The use of a sharp or pointed instrument to remove any marine mammal from the net is prohibited.

(iii) *Sundown sets prohibited.* On every set encircling dolphin, the backdown procedure must be completed no later than one-half hour after sundown, except as provided here. For the purpose of this section, sundown is defined as the time at which the upper edge of the sun disappears below the horizon or, if the view of the sun is obscured, the local time of sunset calculated from tables developed by the U.S. Naval Observatory or other authoritative source approved by the Administrator, Southwest Region. A sundown set is a set in which the backdown procedure has not been completed and rolling the net to sack-up has not begun within one-half hour after sundown. Should a set extend beyond one-half hour after sundown, the operator must use the required marine mammal release procedures including the use of the high intensity lighting system. In the event a sundown set occurs where the seine skiff was let go 90 or more minutes before sundown, and an earnest effort to rescue dolphins is made, the International Review Panel of the IDCP may recommend to the United States that in the view of the International Review Panel, prosecution by the United States is not recommended. Any such recommendation will be considered by the United States in evaluating the appropriateness of prosecution in a particular circumstance.

(iv) *Dolphin safety panel.* During backdown, the dolphin safety panel must be positioned so that it protects the perimeter of the backdown area. The perimeter of the backdown area is the length of corkline that begins at the outboard end of the last bow bunch pulled and continues to at least two-thirds the distance from the backdown

channel apex to the stern tiedown point.

(7) *Experimental fishing operations.* The Administrator, Southwest Region, may authorize experimental fishing operations, consistent with the provisions of the IDCP, for the purpose of testing proposed improvements in fishing techniques and equipment that may reduce or eliminate dolphin mortality or serious injury, or do not require the encirclement of dolphins in the course of fishing operations. The Administrator, Southwest Region, may waive, as appropriate, any requirements of this section except DMLs and the obligation to carry an observer.

(i) A vessel permit holder may apply to the Administrator, Southwest Region, for an experimental fishing operation waiver allowing for processing no less than 90 days before the date the proposed operation is intended to begin. An application must be signed by the permitted operator and contain:

(A) The name(s) of the vessel(s) and the vessel permit holder(s) to participate;

(B) A statement of the specific vessel gear and equipment or procedural requirement to be exempted and why such an exemption is necessary to conduct the experiment;

(C) A description of how the proposed modification to the gear and equipment or procedures is expected to reduce incidental mortality or serious injury of marine mammals;

(D) A description of the applicability of this modification to other purse seine vessels;

(E) The planned design, time, duration, and general area of the experimental operation;

(F) The name(s) of the permitted operator(s) of the vessel(s) during the experiment; and

(G) A statement of the qualifications of the individual or company doing the analysis of the research.

(ii) The Administrator, Southwest Region, will acknowledge receipt of the application and, upon determining that it is complete, will publish a notice in the FEDERAL REGISTER summarizing the application, making the full application available for inspection and inviting comments for a minimum period of 30 days from the date of publication.

(iii) The Administrator, Southwest Region, after considering the information in the application and the comments received on it, will either issue a waiver to conduct the experiment which includes restrictions or conditions deemed appropriate, or deny the application, giving the reasons for denial.

(iv) A waiver for an experimental fishing operation will be valid only for the vessels and operators named in the permit, for the time period and areas specified, for trips carrying an observer designated by the Administrator, Southwest Region, when all the terms and conditions of the permit are met.

(v) The Administrator, Southwest Region, may suspend or revoke an experimental fishing waiver in accordance with 15 CFR part 904 if the terms and conditions of the waiver or the provisions of the regulations are not followed.

(8) *Operator permit holder performance requirements.* [Reserved]

(9) *Vessel permit holder dolphin mortality limits.* For purposes of this paragraph, the term "vessel permit holder" includes both the holder of a current vessel permit and also the holder of a vessel permit for the following year.

(i) By September 1 each year, a vessel permit holder desiring a DML for the following year must provide to the Administrator, Southwest Region, the name of the United States purse seine fishing vessel(s) of carrying capacity greater than 400 st (362.8 mt) carrying capacity that the owner intends to use to intentionally deploy purse seine fishing nets in the ETP to encircle dolphins in an effort to capture tuna during the following year. NMFS will forward the list of purse seine vessels to the Director of the IATTC on or before October 1, or as otherwise required by the IDCP, for assignment of a DML for the following year under the provisions of Annex IV of the Agreement on the IDCP.

(ii) Each vessel permit holder that desires a DML only for the period between July 1 to December 31 must provide the Administrator, Southwest Region, by September 1 of the prior year, the name of the United States purse seine fishing vessel(s) of greater than 400 st (362.8 mt) carrying capacity that

the owner intends to use to intentionally deploy purse seine fishing nets in the ETP to encircle dolphins in an effort to capture tuna during the period. NMFS will forward the list of purse seine vessels to the Director of the IATTC on or before October 1, or as otherwise required under the IDCP, for possible assignment of a DML for the 6-month period July 1 to December 31. Under the IDCP, the DML will be calculated by the IDCP from any unutilized pool of DMLs in accordance with the procedure described in Annex IV of the Agreement on the IDCP and will not exceed one-third of an unadjusted full-year DML as calculated by the IDCP.

(iii)(A) The Administrator, Southwest Region, will notify vessel owners of the DML assigned for each vessel for the following year, or the second half of the year, as applicable.

(B) The Administrator, Southwest Region, may adjust the DMLs in accordance with Annex IV of the Agreement on the IDCP. All adjustments of full-year DMLs will be made before January 1, and the Administrator, Southwest Region, will notify the Director of the IATTC of any adjustments prior to a vessel departing on a trip using its adjusted DML. The notification will be no later than February 1 in the case of adjustments to full-year DMLs, and no later than May 1 in the case of adjustments to DMLs for the second half of the year.

(C) Within the requirements of Annex IV of the Agreement on the IDCP, the Administrator, Southwest Region, may adjust a vessel's DML if it will further scientific or technological advancement in the protection of marine mammals in the fishery or if the past performance of the vessel indicates that the protection or use of the yellowfin tuna stocks or marine mammals is best served by the adjustment, within the mandates of the MMPA. Experimental fishing operation waivers or scientific research permits will be considered a basis for adjustments.

(iv)(A) A vessel assigned a full-year DML that does not make a set on dolphins by April 1 or that leaves the fishery will lose its DML for the remainder of the year, unless the failure to set on dolphins is due to *force majeure* or other

extraordinary circumstances as determined by the International Review Panel.

(B) A vessel assigned a DML for the second half of the year will be considered to have lost its DML if the vessel has not made a set on dolphins before December 31, unless the failure to set on dolphins is due to *force majeure* or extraordinary circumstances as determined by the International Review Panel.

(C) Any vessel that loses its DML for 2 consecutive years will not be eligible to receive a DML for the following year.

(D) NMFS will determine, based on available information, whether a vessel has left the fishery.

(I) A vessel lost at sea, undergoing extensive repairs, operating in an ocean area other than the ETP, or for which other information indicates will no longer be conducting purse seine operations in the ETP for the remainder of the period covered by the DML will be determined to have left the fishery.

(2) NMFS will make all reasonable efforts to determine the intentions of the vessel owner, and the owner of any vessel that has been preliminarily determined to have left the fishery will be provided notice of such preliminary determination and given the opportunity to provide information on whether the vessel has left the fishery prior to NMFS making a final determination under 15 CFR part 904 and notifying the IATTC.

(v) Any vessel that exceeds its assigned DML after any applicable adjustment under paragraph (c)(8)(iii) of this section will have its DML for the subsequent year reduced by 150 percent of the overage, unless another adjustment is determined by the International Review Panel.

(vi) A vessel that is covered by a valid vessel permit and that does not normally fish for tuna in the ETP but desires to participate in the fishery on a limited basis may apply for a per-trip DML from the Administrator, Southwest Region, at any time, allowing at least 60 days for processing. The request must state the expected number of trips involving sets on dolphins and the anticipated dates of the trip or trips. The request will be forwarded to

the Director of the IATTC for processing in accordance with Annex IV of the Agreement on the IDCP. A per-trip DML will be assigned if one is made available in accordance with the terms of Annex IV of the IDCP. If a vessel assigned a per-trip DML does not set on dolphins during that trip, the vessel will be considered to have lost its DML unless this was a result of *force majeure* or other extraordinary circumstances as determined by the International Review Panel. After two consecutive losses of a DML, a vessel will not be eligible to receive a DML for the next fishing year.

(vii) Observers will make their records available to the vessel operator at any reasonable time, including after each set, in order for the operator to monitor the balance of the DML(s) remaining for use.

(viii) Vessel and operator permit holders must not deploy a purse seine net on or encircle any school of dolphins containing individuals of a particular stock of dolphins:

(A) When the applicable per-stock per-year dolphin mortality limit for that stock of dolphins (or for that vessel, if so assigned) has been reached or exceeded; or

(B) After the time and date provided in actual notification or notification in the FEDERAL REGISTER by the Administrator, Southwest Region, based upon the best available evidence, stating when any applicable per-stock per-year dolphin mortality limit has been reached or exceeded, or is expected to be reached in the near future.

(ix) If individual dolphins belonging to a stock that is prohibited from being taken are not reasonably observable at the time the net skiff attached to the net is released from the vessel at the start of a set, the fact that individuals of that stock are subsequently taken will not be cause for enforcement action provided that all procedures required by the applicable regulations have been followed.

(x) Vessel and operator permit holders must not intentionally deploy a purse seine net on or encircle dolphins intentionally:

(A) When the vessel's DML, as adjusted, is reached or exceeded; or

(B) After the date and time provided in actual notification by letter, facsimile, radio, or electronic mail, or notice in the FEDERAL REGISTER by the Administrator, Southwest Region, based upon the best available evidence, that intentional sets on dolphins must cease because the total of the DMLs assigned to the U.S. fleet has been reached or exceeded, or is expected to be exceeded in the near future.

(xi) Sanctions recommended by the International Review Panel for any violation of these rules will be considered by NMFS and NOAA in enforcement actions brought under these regulations.

(xii) Intentionally deploying a purse seine net on, or to encircle, dolphins after a vessel's DML, as adjusted, has been reached will disqualify the vessel from consideration for a DML for the following year. If already assigned, the DML for the following year will be withdrawn, and the Director of the IATTC will be notified by NMFS that the DML assigned to that vessel will be unutilized. Procedures found at 15 CFR part 904 apply to the withdrawal of the permit.

(d) *Purse seining by vessels without assigned DMLs.* In addition to the requirements of paragraph (b) of this section, a vessel permit used for a trip not involving an assigned DML and the operator's permit when used on such a vessel are subject to the following terms and conditions: a permit holder may take marine mammals provided that such taking is an accidental occurrence in the course of normal commercial fishing operations and the vessel does not intentionally deploy its net on, or to encircle, dolphins; marine mammals taken incidental to such commercial fishing operations must be immediately returned to the environment where captured without further injury, using release procedures such as hand rescue, and aborting the set at the earliest effective opportunity; the use of one or more rafts and face masks or view boxes to aid in the rescue of dolphins is recommended.

(e) *Observers:* (1) The holder of a vessel permit must allow an observer duly authorized by the Administrator, Southwest Region, to accompany the vessel on all fishing trips in the ETP

for the purpose of conducting research and observing operations, including collecting information that may be used in civil or criminal penalty proceedings, forfeiture actions, or permit sanctions. A vessel that fails to carry an observer in accordance with these requirements may not engage in fishing operations.

(2) Research and observation duties will be carried out in such a manner as to minimize interference with commercial fishing operations. Observers must be provided access to vessel personnel and to dolphin safety gear and equipment, electronic navigation equipment, radar displays, high powered binoculars, and electronic communication equipment. The navigator must provide true vessel locations by latitude and longitude, accurate to the nearest minute, upon request by the observer. Observers must be provided with adequate space on the bridge or pilothouse for clerical work, as well as space on deck adequate for carrying out observer duties. No vessel owner, master, operator, or crew member of a permitted vessel may impair, or in any way interfere with, the research or observations being carried out. Masters must allow observers to use vessel communication equipment to report information concerning the take of marine mammals and other observer collected data upon request of the observer.

(3) Any marine mammals killed during fishing operations that are accessible to crewmen and requested from the permit holder or master by the observer must be brought aboard the vessel and retained for biological processing, until released by the observer for return to the ocean. Whole marine mammals or marine mammal parts designated as biological specimens by the observer must be retained in cold storage aboard the vessel until retrieved by authorized personnel of NMFS or the IATTC when the vessel returns to port for unloading.

(4) It is unlawful for any person to forcibly assault, impede, intimidate, interfere with, or to influence or attempt to influence an observer, or to harass (including sexual harassment) an observer by conduct which has the

§ 216.24

purpose or effect of unreasonably interfering with the observer's work performance, or which creates an intimidating, hostile, or offensive environment. In determining whether conduct constitutes harassment, the totality of the circumstances, including the nature of the conduct and the context in which it occurred, will be considered. The determination of the legality of a particular action will be made from the facts on a case-by-case basis.

(5)(i) All observers must be provided sleeping, toilet and eating accommodations at least equal to that provided to a full crew member. A mattress or futon on the floor or a cot is not acceptable in place of a regular bunk. Meal and other galley privileges must be the same for the observer as for other crew members.

(ii) Female observers on a vessel with an all-male crew must be accommodated either in a single-person cabin or, if reasonable privacy can be ensured by installing a curtain or other temporary divider, in a two-person cabin shared with a licensed officer of the vessel. If the cabin assigned to a female observer does not have its own toilet and shower facilities that can be provided for the exclusive use of the observer, then a schedule for time-sharing common facilities must be established before the placement meeting and approved by NMFS or other approved observer program and must be followed during the entire trip.

(iii) In the event there are one or more female crew members, the female observer must be provided a bunk in a cabin shared solely with female crew members, and provided toilet and shower facilities shared solely with these female crew members.

(f) *Importation, purchase, shipment, sale and transport.* (1)(i) It is illegal to import into the United States any fish, whether fresh, frozen, or otherwise prepared, if the fish have been caught with commercial fishing technology that results in the incidental kill or incidental serious injury of marine mammals in excess of that allowed under this part for U.S. fishermen, or as specified at paragraphs (f)(7) through (f)(9) of this section.

(ii) For purposes of this paragraph(f), and in applying the definition of an

50 CFR Ch. II (10–1–02 Edition)

“intermediary nation,” an import occurs when the fish or fish product is released from a nation's Customs' custody and enters into the territory of the nation. For other purposes, “import” is defined in § 216.3.

(2)(i) *HTS numbers requiring a Fisheries Certificate of Origin, subject to yellowfin tuna embargo.* The following U.S. Harmonized Tariff Schedule (HTS) numbers identify yellowfin tuna or yellowfin tuna products that are harvested in the ETP purse seine fishery and imported into the United States. All shipments containing tuna or tuna products imported into the United States under these HTS numbers must be accompanied by a Fisheries Certificate of Origin (FCO), NOAA Form 370. Yellowfin tuna identified by any of the following HTS numbers that was harvested using a purse seine in the ETP may not be imported into the United States unless both the nation with jurisdiction over the harvesting vessel and the exporting nation (if different) have an affirmative finding under paragraph (f)(9) of this section.

(A) Frozen:	
0303.42.0020	Yellowfin tuna, whole, frozen.
0303.42.0040	Yellowfin tuna, eviscerated, head on, frozen.
0303.42.0060	Yellowfin tuna, other, frozen.
(B) Canned:	
1604.14.1000	Tuna, non-specific, in airtight containers, in oil.
1604.14.2040	Tuna, other than albacore, not over 7kg, in airtight containers.
1604.14.3040	Tuna, other than albacore, in airtight containers, not in oil, over quota.
(C) Loins:	
1604.14.4000	Tuna, not in airtight containers, not in oil, over 6.8kg.
1604.14.5000	Tuna, other, not in airtight containers.
(D) Other (only if the product contains tuna):	
0304.10.4099	Other fish, fillets and other fish meat, fresh or chilled.
0304.20.2066	Other fish, fillets, skinned, in blocks weighing over 4.5kg, frozen.
0304.20.6096	Other fish, fillets, frozen.
0304.90.1089	Other fish meat, in bulk or immediate containers, fresh or chilled.
0304.90.9091	Other fish meat, fresh or chilled.

(ii) *HTS numbers requiring a Fisheries Certificate of Origin, not subject to yellowfin tuna embargo.* The following HTS numbers identify tuna or tuna products, other than fresh tuna or tuna identified in paragraph (f)(2)(i) of this

National Marine Fisheries Service/NOAA, Commerce

§ 216.24

section, known to be imported into the United States. All shipments imported into the United States under these HTS numbers must be accompanied by a FCO. The shipment may not be imported into the United States if harvested by a large-scale driftnet nation, unless accompanied by the official statement described in paragraph (f)(5)(x) of this section.

<i>(A) Frozen:</i>	
0303.41.0000	Albacore or longfinned tunas, frozen.
0303.43.0000	Skipjack, frozen.
0303.49.0020	Bluefin, frozen.
0303.49.0040	Other tuna, frozen.
<i>(B) Canned:</i>	
1604.14.2020	Albacore tuna, in airtight containers, not in oil, not over 7kg, in quota.
1604.14.3020	Albacore tuna, in airtight containers, not in oil, not in quota.

(iii) *Exports from driftnet nations only: HTS numbers requiring a Fisheries Certificate of Origin and official certification.* The following HTS numbers identify categories of fish and shellfish, other than those identified in paragraphs (f)(2)(i) and (f)(2)(ii) of this section, known to have been harvested using a large-scale driftnet and imported into the United States. Shipments exported from a large-scale driftnet nation and imported into the United States under any of the HTS numbers listed in paragraph (f)(2) of this section must be accompanied by an FCO and the official statement described in paragraph (f)(5)(x) of this section.

<i>(A) Frozen:</i>	
0303.10.0012	Salmon, chinook, frozen.
0303.10.0022	Salmon, chum, frozen.
0303.10.0032	Salmon, pink, frozen.
0303.10.0042	Salmon, sockeye, frozen.
0303.10.0052	Salmon, coho, frozen.
0303.10.0062	Salmon, Pacific, non-specific, frozen.
0303.21.0000	Trout, frozen.
0303.22.0000	Salmon, Atlantic and Danube, frozen.
0303.29.0000	Salmonidae, other, frozen.
0303.70.4097	Fish, other, frozen.
0303.75.0010	Dogfish, frozen.
0303.75.0090	Other sharks, frozen.
0303.79.2041	Swordfish steaks, frozen.
0303.79.2049	Swordfish, other, frozen.
0304.20.2066	Fish, fillet, skinned, in blocks frozen over 4.5kg.
0304.20.6008	Salmonidae, salmon fillet, frozen.
0304.20.6096	Fish, fillet, frozen.
0307.49.0010	Squid, other, fillet, frozen.
<i>(B) Canned:</i>	
1604.11.2020	Salmon, pink, canned in oil, in airtight containers.

1604.11.2030	Salmon, sockeye, canned in oil, in airtight containers.
1604.11.2090	Salmon, other, canned in oil, in airtight containers.
1604.11.4010	Salmon, chum, canned, not in oil.
1604.11.4020	Salmon, pink, canned, not in oil.
1604.11.4030	Salmon, sockeye, canned, not in oil.
1604.11.4040	Salmon, other, canned, not in oil.
1604.11.4050	Salmon, other, canned, not in oil.
1604.19.2000	Fish, other, in airtight containers, not in oil.
1604.19.3000	Fish, other, in airtight containers, in oil.
1605.90.6055	Squid, loligo, prepared/preserved.
<i>(C) Other:</i>	
0304.10.4099	Other fish, fillets and other fish meat, fresh or chilled.
0304.20.2066	Other fish, fillets, skinned, in blocks weighing over 4.5kg, frozen.
0304.20.6098	Other fish, fillets, frozen.
0304.90.1089	Other fish, fillets and fish meat, in bulk or in immediate containers, fresh or chilled.
0304.90.9092	Other fish meat, fresh or chilled.
0305.30.6080	Fish, non-specific, fillet. dried/salted/brine.
0305.49.4040	Fish, non-specific, smoked.
0305.59.2000	Shark fins.
0305.59.4000	Fish, non-specific, dried.
0305.69.4000	Salmon, non-specific, salted.
0305.69.5000	Fish, non-specific, in immediate containers, salted, not over 6.8kg.
0305.69.6000	Fish, non-specific, salted, other.
0307.49.0050	Squid, non-specific, frozen/dried/salted/brine.
0307.49.0060	Squid, non-specific, & cuttle fish frozen/dried/salted/brine.

(3) *Imports requiring a Fisheries Certificate of Origin.* Shipments containing the following may not be imported into the United States unless a completed FCO is filed with the Customs Service at the time of importation:

(i) Tuna classified under an HTS number listed in paragraphs (f)(2)(i) or (f)(2)(ii) of this section, or

(ii) Fish classified under an HTS number listed in paragraph (f)(2) of this section that was harvested by a vessel of a large-scale driftnet nation, as identified under paragraph (f)(8) of this section.

(4) *Disposition of Fisheries Certificates of Origin.* The FCO form described in paragraph (f)(5) of this section may be obtained from the Administrator, Southwest Region, or downloaded from the Internet at <http://swr.ucsd.edu/noaa370.htm>. The FCO required under paragraph (f)(3) of this section must accompany the tuna or tuna products from entry into the United States, through final processing, and it must

be endorsed at each change in ownership. FCOs that require multiple endorsements must be submitted to the Administrator, Southwest Region, by the last endorser when all required endorsements are completed. An invoice must accompany the shipment at the time of importation or, in the alternative, must be made available within 30 days of a request by the Secretary or the Administrator, Southwest Region, to produce the invoice.

(5) *Contents of Fisheries Certificate of Origin.* An FCO, certified to be accurate by the first exporter of the accompanying shipment, must include the following information:

- (i) Customs entry identification;
- (ii) Date of entry;
- (iii) Exporter's full name and complete address;
- (iv) Importer's or consignee's full name and complete address;
- (v) Species description, product form, and HTS number;
- (vi) Total net weight of the shipment in kilograms;
- (vii) Ocean area where the fish were harvested (ETP, Western Pacific Ocean, South Pacific Ocean, Atlantic Ocean, Caribbean Sea, Indian Ocean, or other);
- (viii) Type of fishing gear used to harvest the fish (purse seine, longline, baitboat, large-scale driftnet, gillnet, trawl, pole and line, or other);
- (ix) Country under whose laws the harvesting vessel operated based upon the flag of the vessel or, if a certified charter vessel, the country that accepted responsibility for the vessel's fishing operations;
- (x) Dates on which the fishing trip began and ended;
- (xi) If the shipment includes tuna or products harvested with a purse seine net, the name of the harvesting vessel;
- (xii) Dolphin safe condition of the shipment;
- (xiv) For shipments harvested by vessels of a nation known to use large-scale driftnets, as determined by the Secretary pursuant to paragraph (f)(8) of this section, a statement must be included on the Fisheries Certificate of Origin that is dated and signed by a responsible government official of the harvesting nation, certifying that the fish or fish products were harvested by

a method other than large-scale driftnet; and

(xii) If the shipment contains tuna harvested in the ETP by a purse seine vessel of more than 400 st (362.8 mt) carrying capacity, each importer or processor who takes custody of the shipment must sign and date the form to certify that the form and attached documentation accurately describe the shipment of fish that they accompany.

(6) *Dolphin-safe label.* Tuna or tuna products sold in or exported from the United States that include on the label the term "dolphin-safe" or any other term or symbol that claims or suggests the tuna were harvested in a manner not injurious to dolphins are subject to the requirements of subpart H of this part.

(7) *Scope of embargoes*—(i) *ETP yellowfin tuna embargo.* Yellowfin tuna or yellowfin tuna products harvested using a purse seine in the ETP identified by an HTS number listed in paragraph (f)(2)(i) of this section may not be imported into the United States if such tuna or tuna products were:

(A) Harvested on or after March 3, 1999, the effective date of section 4 of the IDCPA, and harvested by, or exported from, a nation that the Assistant Administrator has determined has purse seine vessels of greater than 400 st (362.8 mt) carrying capacity harvesting tuna in the ETP, unless the Assistant Administrator has made an affirmative finding required for importation for that nation under paragraph (f)(9) of this section;

(B) Exported from an intermediary nation, as defined in section 3 of the MMPA, and a ban is currently in force prohibiting the importation from that nation under paragraph (f)(9)(viii) of this section; or

(C) Harvested before March 3, 1999, the effective date of section 4 of the IDCPA, and would have been banned from importation under section 101(a)(2) of the MMPA at the time of harvest.

(ii) *Driftnet embargo.* A shipment containing an item listed in paragraph (f)(2) of this section may not be imported into the United States if it:

(A) Was exported from or harvested on the high seas by any nation determined by the Assistant Administrator

to be engaged in large-scale driftnet fishing, unless the FCO is accompanied by an original statement by a responsible government official of the harvesting nation, signed and dated by that official, certifying that the fish or fish products were harvested by a method other than large-scale driftnet; or

(B) Is identified on the FCO as having been harvested by a large-scale driftnet.

(8) *Large-scale driftnet nation: determination.* Based upon the best information available, the Assistant Administrator will determine which nations have registered vessels that engage in fishing using large-scale driftnets. Such determinations will be published in the FEDERAL REGISTER. A responsible government official of any such nation may certify to the Assistant Administrator that none of the nation's vessels use large-scale driftnets. Upon receipt of the certification, the Assistant Administrator may find, and publish such finding in the FEDERAL REGISTER, that none of that nation's vessels engage in fishing with large-scale driftnets.

(9) *Affirmative finding procedure for nations harvesting yellowfin tuna using a purse seine in the ETP.* (i) The Assistant Administrator will determine, on an annual basis, whether to make an affirmative finding based upon documentary evidence provided by the government of the exporting nation, by the government of the harvesting nation, if different, or by the IDCP and the IATTC, and will publish the finding in the FEDERAL REGISTER. A finding will remain valid for 1 year or for such other period as the Assistant Administrator may determine. An affirmative finding will be terminated if the Assistant Administrator determines that the requirements of this paragraph are no longer being met. Every 5 years, the government of the harvesting nation, must submit such documentary evidence directly to the Assistant Administrator and request an affirmative finding. Documentary evidence needs to be submitted by the harvesting nation for the first affirmative finding subsequent to the effective date of this rule. The Assistant Administrator may require the submission of supporting

documentation or other verification of statements made in connection with requests to allow importations. An affirmative finding applies to tuna and tuna products that were harvested by vessels of the nation after February 15, 1999. To make an affirmative finding, the Assistant Administrator must find that:

(A) The harvesting nation participates in the IDCP and is either a member of the IATTC or has initiated (and within 6 months thereafter completed) all steps required of applicant nations, in accordance with article V, paragraph 3, of the Convention establishing the IATTC, to become a member of that organization;

(B) The nation is meeting its obligations under the IDCP and its obligations of membership in the IATTC, including all financial obligations;

(C)(1) The annual total dolphin mortality of the nation's purse seine fleet (including certified charter vessels operating under its jurisdiction) did not exceed the aggregated total of the mortality limits assigned by the IDCP for that nation's purse seine vessels for the year preceding the year in which the finding would start; or

(2)(i) Because of extraordinary circumstances beyond the control of the nation and the vessel captains, the total dolphin mortality of the nation's purse seine fleet (including certified charter vessels operating under its jurisdiction) exceeded the aggregated total of the mortality limits assigned by the IDCP for that nation's purse seine vessels; and

(ii) Immediately after the national authorities discovered the aggregate mortality of its fleet had been exceeded, the nation required all its vessels to cease fishing for tuna in association with dolphins for the remainder of the calendar year; and

(D)(1) For calendar year 2000 and any subsequent years in which the parties agree to a global allocation system for per-stock per-year individual stock quotas, the nation responded to the notification from the IATTC that an individual stock quota had been reached by prohibiting any additional sets on the stock for which the quota had been reached;

(2) If a per-stock per-year quota is allocated to each nation, the annual per-stock per-year dolphin mortality of the nation's purse seine fleet (including certified charter vessels operating under its jurisdiction) did not exceed the aggregated total of the per-stock per-year limits assigned by the IDCP for that nation's purse seine vessels (if any) for the year preceding the year in which the finding would start; or

(3)(i) Because of extraordinary circumstances beyond the control of the nation and the vessel captains, the per-stock per-year dolphin mortality of the nation's purse seine fleet (including certified charter vessels operating under its jurisdiction) exceeded the aggregated total of the per-stock per-year limits assigned by the IDCP for that nation's purse seine vessels; and

(ii) Immediately after the national authorities discovered the aggregate per-stock mortality limits of its fleet had been exceeded, the nation required all its vessels to cease fishing for tuna in association with the stocks whose limits had been exceeded, for the remainder of the calendar year.

(ii) *Documentary Evidence and Compliance with the IDCP.*—(A) *Documentary Evidence.* The Assistant Administrator will make an affirmative finding under paragraph (f)(9)(i) of this section only if the government of the harvesting nation provides directly to the Assistant Administrator, or authorizes the IATTC to release to the Assistant Administrator, complete, accurate, and timely information that enables the Assistant Administrator to determine whether the harvesting nation is meeting the obligations of the IDCP, and whether ETP-harvested tuna imported from such nation comports with the tracking and verification regulations of subpart H of this part.

(B) *Revocation.* After considering the information provided under paragraph (f)(9)(ii)(A) of this section, each party's financial obligations to the IATTC, and any other relevant information, including information that a nation is consistently failing to take enforcement actions on violations which diminish the effectiveness of the IDCP, the Assistant Administrator, in consultation with the Secretary of State, will revoke an affirmative finding issued to a

nation that is not meeting the obligations of the IDCP.

(iii) A harvesting nation may apply for an affirmative finding at any time by providing to the Assistant Administrator the information and authorizations required in paragraphs (f)(9)(i) and (f)(9)(ii) of this section, allowing at least 60 days from the submission of complete information to NMFS for processing.

(iv) The Assistant Administrator will make or renew an affirmative finding for the period from April 1 through March 31, or portion thereof, if the harvesting nation has provided all the information and authorizations required by paragraphs (f)(9)(i) and (f)(9)(ii) of this section, and has met the requirements of paragraphs (f)(9)(i) and (f)(9)(ii) of this section.

(v) *Reconsideration of finding.* The Assistant Administrator may reconsider a finding upon a request from, and the submission of additional information by, the harvesting nation, if the information indicates that the nation has met the requirements under paragraphs (f)(9)(i) and (f)(9)(ii) of this section.

(vi) *Intermediary nation.* Except as authorized under this paragraph, no tuna or tuna products classified under one of the HTS numbers listed in paragraph (f)(2)(i) of this section may be imported into the United States from any intermediary nation. An "intermediary nation" is a nation that exports yellowfin tuna or yellowfin tuna products to the United States and that imports yellowfin tuna or yellowfin tuna products that are subject to a direct ban on importation into the United States pursuant to section 101(a)(2)(B) of the MMPA, unless shown not to be yellowfin tuna or yellowfin tuna products harvested using purse seine in the ETP. The Assistant Administrator will publish in the FEDERAL REGISTER a notice announcing when NMFS has determined, based on the best information available, that a nation is an "intermediary nation." After the effective date of that notice, these import restrictions shall apply. Shipments of yellowfin tuna or yellowfin tuna products shipped through a nation on a through bill of lading or in another

manner that does not enter the shipments into that nation as an importation do not make that nation an intermediary nation.

(A) *Intermediary nation determination status.* Imports from an intermediary nation of tuna and tuna products classified under any of the HTS numbers in paragraph (f)(2)(i) of this section may be imported into the United States only if the Assistant Administrator determines and publishes in the FEDERAL REGISTER that the intermediary nation has provided certification and reasonable proof that it has not imported in the preceding 6 months yellowfin tuna or yellowfin tuna products that are subject to a ban on direct importation into the United States under section 101(a)(2)(B) of the MMPA. At that time, the nation shall no longer be considered an "intermediary nation" and these import restrictions shall no longer apply.

(B) *Changing the status of intermediary nation determinations.* The Assistant Administrator will review decisions under this paragraph upon the request of an intermediary nation. Such requests must be accompanied by specific and detailed supporting information or documentation indicating that a review or reconsideration is warranted. For purposes of this paragraph, the term "certification and reasonable proof" means the submission to the Assistant Administrator by a responsible government official from the nation of a document reflecting the nation's customs records for the preceding 6 months, together with a certification attesting that the document is accurate.

(vii) *Pelly certification.* After 6 months of an embargo being in place against a nation under this section, that fact will be certified to the President for purposes of certification under section 8(a) of the Fishermen's Protective Act of 1967 (22 U.S.C. 1978(a)) for as long as the embargo remains in effect.

(viii) *Coordination.* The Assistant Administrator will promptly advise the Department of State and the Department of the Treasury of embargo decisions, actions and finding determinations.

(10) *Fish refused entry.* If fish is denied entry under paragraph (f)(3) of this sec-

tion, the District Director of Customs shall refuse to release the fish for entry into the United States and shall issue a notice of such refusal to the importer or consignee.

(11) *Disposition of fish refused entry into the United States; redelivered fish.* Fish which is denied entry under paragraph (f)(3) of this section and which is not exported under Customs supervision within 90 days from the date of notice of refusal of admission or date of redelivery shall be disposed of under Customs laws and regulations. Provided however, that any disposition shall not result in an introduction into the United States of fish caught in violation of the MMPA.

(12) *Market Prohibitions.* It is unlawful for any person to sell, purchase, offer for sale, transport, or ship in the United States, any tuna or tuna products unless the tuna products are either:

- (i) Dolphin-safe under subpart H; or
- (ii) harvested in compliance with the IDCP by vessels under the jurisdiction of a nation that is a member of the IATTC or has initiated, and within 6 months thereafter completes, all steps required by applicant nations to become members of the IATTC.
- (iii) For purposes of this section, tuna or tuna products are "dolphin-safe" if they are dolphin-safe under subpart H.

(g) *Penalties.* Any person or vessel subject to the jurisdiction of the United States will be subject to the penalties provided for under the MMPA for the conduct of fishing operations in violation of these regulations.

[65 FR 48, Jan 3, 2000]

§ 216.25 Exempted marine mammals and marine mammal products.

(a) The provisions of the MMPA and these regulations shall not apply:

- (1) To any marine mammal taken before December 21, 1972¹, or
- (2) To any marine mammal product if the marine mammal portion of such

¹In the context of captive maintenance of marine mammals, the only marine mammals exempted under this section are those that were actually captured or otherwise in captivity before December 21, 1972.
